Education

Shree L.R Tiwari College Of Engineering

2019 - 2023

Bachelor Of Engineering (B.E) - Information Technology

Thane

- CGPA (till semester 6) : 8.33
- Member of Technical Committee - CodeYantra (SLRTCE)

Pace Junior Science College

2018 - 2019

HSC/Intermediate - Science

Mumbai

- Grade : 66%

National English High School

2016 - 2017

SSC/Matriculate

Palghar

- Grade : 83.5%

Technical Skills

Languages: HTML, CSS, JavaScript, C++, DSA, Python (Fundamentals)

Developer Tools: VS Code, Google Cloud Platform, Amazon Web Services (AWS), MongoDB Atlas

Technologies/Frameworks: Bootstrap, React, NodeJS, Express, Svelte, Git, GitHub

Projects

Tution Classes Website

2021

SLRTCE

Mumbai

- Made a website for tuition classes using HTML, Bootstrap.
- It has different sections on the home page for different subjects and users can select which subjects they want to get classes for.
- [GitHub](#)
- [Live link](#)

Task Manager App

2022

SLRTCE

Mumbai

- Made a task manager/to-do list website. Front-end is developed using HTML, CSS and JS.
- Written a back-end API using NodeJS and Express which performs CRUD operations.
- Users can add a task, update the task to set it to completed/change name of the task and can delete the tasks which are not required.
- Used MongoDB Atlas to create a database to store and retrieve the tasks.

- [Live link](#)

Food Ordering Website

2022

SLRTCE

Mumbai

- Made a website for a restaurant using HTML, CSS, Bootstrap and JS.
- Added a sign-up and sign-in page to the website.
- Integrated a chat-bot to help users in the ordering process. The chat-bot also confirms the order.
- [GitHub](#)

Customer Segmentation Using K-Means Clustering

2022

SLRTCE

Mumbai

- Divided customers using basic data of customers like age, gender, annual income and spending score.
- Used Mall Customer Segmentation Data which is available on Kaggle.
- From the segmented customers we can decide what type of advertisements have to be targeted on the specific group of customers.
- [GitHub](#)

Certifications

Software Engineering Virtual Experience (Forage)

Oct 2022

JPMorgan Chase & Co

Mumbai

- Joined a virtual experience program in which I performed 3 tasks which were related to software engineering.
- Interface with a stock price data feed.
- Use JPMC frameworks and tools.
- Display data visually for traders.
- [See credential](#)

AWS Academy Graduate - AWS Academy Cloud Foundations

July 2022

Amazon Web Services (AWS)

Thane

- Online course in which we were trained on different AWS technologies like Amazon EC2, Amazon S3, AWS Autoscaling, AWS IAM, Elastic Load Balancing (ELB).
- Created an auto scaling group in an EC2 instance which auto scales the number of instances according to user needs with the help of load balancers.
- [See credential](#)

Basic Image Classification with TensorFlow

Aug 2022

Coursera

Mumbai

- Used the MNIST data set for this guided project.
- In this guided project we have trained and evaluated a model which predicts the actual digit from the images of handwritten digits.
